

MAKING AN IMPACT THROUGH SUSTAINABILITY

MARS is investing \$1 Billion to combat urgent threats facing our business and the societies in which we operate.

SUSTAINABLE in a GENERATION plan

We're combining our five business principles—quality, responsibility, mutuality, efficiency and freedom—with science to better operate within planetary boundaries and deliver a positive social impact.

OUR PLAN FOCUSES ON THREE INTERCONNECTED AMBITIONS:

Reduce environmental impacts in line with what science says is necessary to keep the planet healthy.

Significantly improve the working lives of 1 million people in our value chain to help them thrive.

Advance science, innovation and marketing in ways that help billions of people and their pets lead healthier, happier lives.

CREATING MUTUAL BENEFITS

at the heart of the way we do business

We continuously place sustainability at the heart of the way we do business.

mutual benefit

Our business decisions must benefit our company, but also provide a mutual benefit across the social, economic and environmental spectrums we have an impact.

reducing our impact

We're committed to reducing our carbon footprint, water usage and waste to landfill by 3% each year.

people and planet

We believe that the only lasting success is one that benefits both people and the planet.

future generations

Meeting today's needs shouldn't compromise the ability of future generations to meet tomorrow's needs.

goals
